BIODEGRAF®

ORANGE

CLIP FOR ALL TYPES OF VINE

Our degradable clips are made from food-grade plastic so that they have no impact on the health of juices. They degrade by fragmentation under the effect of UV light (which is why they are called photodegradable), extreme temperatures and wire tension.

Ergonomic and lightweight, they don't get tangled up in your pocket and are hand-safe. After several decades in use, the effectiveness and reliability of this range is widely recognised in all French vineyards and abroad. The right choice for a degradable clip is one with sufficient strength at the time of installation (trellising) and very low residual strength so that it can be easily broken before pruning.

Biodegraf® orange is a very low-resistance clip. It has been designed to keep wires above ground in winter. It is suitable for all types of vine.

Very low resistance staple for
wintering

Clip placement recommendation

- One clip between each plant.
- No clip between the post and the plant.

Distance between wires : 15 mm

Wire entry : 5 mm
Ø Max wire diameter : 4 mm

Clip Real Size

Thickness : 1,7 mm
Length : 22,7 mm
Height : 15,8 mm

Average measured resistance of a new clip : 10 Kg

Average residual resistance
measured after one season :
between 2 and 5 Kg.

Packaging

- 2 500 pieces bag- 6 bags per
box
50 boxes / pallet
