# BIODEGRAF®

## — VEGETAL —

### CLIP FOR LOW VINES

The material used in the biodegradable range (Vegetagraf) comes from French agricultural by-products. It is made up of 100% starch and plant fibres. Complete biodegradation takes place over the year in situ and enters the humification cycle. 100% plant-based, the clip leaves no residue thanks to the action of micro-organisms naturally present in the soil. They are made from food-grade materials and are free from heavy metals so as not to harm the juice during the pressing cycle. Ergonomic and lightweight, they won't get tangled up in your pocket and are soft on your hands.

**To celebrate the 35th anniversary of the first model designed by CAVI, Biodegraf® is now available in vegetal version. This model is recommended for trellising low vines.**

#### Product strengths :

- Bio-based
- Biodegradable in 24 months
- Food-grade material
- Ergonomic
- Special for low vines
- High resistance

#### Clip placement recommendations

- One clip between each plant.
- No clip between the post and the plant.

#### Distance between wires : 15 mm

Wire entry : 5 mm  
Ø Max wire diameter : 3,5 mm

#### Clip Real Size

Thickness : 2,5 mm  
Length : 23 mm  
Height : 17 mm

#### Average measured resistance of a new clip : 14 Kg

#### Packaging

- 6 000 pieces bucket  
140 buckets / pallet
- 15 000 pieces bucket  
60 bucket / pallet

All our buckets can be recycled
