CLIP FOR WIDE VINE MEDIUM TO HIGH CONSTRAINTS

CB20_®

Our degradable clips are made from food-grade plastic so that they have no impact on the health of juices. They degrade by fragmentation under the effect of UV light (which is why they are called photodegradable), extreme temperatures and wire tension. Ergonomic and lightweight, they don't get tangled up in your pocket and are hand-safe. After several decades in use, the effectiveness and reliability of this range is widely recognised in all French vineyards and abroad. The right choice for a degradable clip is one with sufficient strength at the time of installation (trellising) and a very low residual strength so that it can be easily broken before pruning.

CB20® is recommended for wide vines with medium to high stress.

Distance between wires: 20 mm

Wire entry: 8 mm

Ø Max wire diameter: 4 mm

Clip Real Size

Thickness: 2 mm Lenght: 29,7 mm Height: 18,1 mm

Average measured resistance of a new clip: 16 Kg

Average residual resistance measured after one year : between 2 and 5 Kg

Packaging

- 5 000 pieces bucket 140 buckets / pallet

•No clip between the post

and the plant.

All our buckets can be recycled
