CLIP FOR ALL TYPE OF VINE
LOW TO HIGH CONSTRAINTS

CB DOUBLE POSITION®

Our degradable clips are made from food-grade plastic so that they have no impact on the health of juices. They degrade by fragmentation under the effect of UV light (which is why they are called photo-degradable), extreme temperatures and wire tension. Ergonomic and lightweight, they don't get tangled up in your pocket and are hand-safe. After several decades in use, the effectiveness and reliability of this range is widely recognised in all French vineyards and abroad. The right choice for a degradable clip is one with sufficient strength at the time of installation (trellising) and a very low residual strength so that it can be easily broken before pruning.

CB DOUBLE POSITION® is a clip with two possible spacings : 10 mm and 20 mm. It is recommended for wide vines with low stresses or to maintain the wires during the first trellising pass.

Clip placement recommendation

- One clip between each plant.
- No clip between the post and the plant.

Distance between wires : 10 & 20 mm

Wire entry : 4,5 mm
Ø Max wire diameter : 4 mm

Clip Real Size

Thickness : 1,6 mm
Length : 30 mm
Height : 24 mm

Average measured resistance of a new clip : 14 Kg

Average residual resistance
measured after one year :
between 2 and 5 Kg

Packaging

- 2 500 pieces bag - 6 bags per
box
50 boxes / pallet
