

MADE IN  
**FRANCE**

CLIP FOR HIGH VINES

**ELIOCLIP<sup>®</sup> 20**

**VEGETAL**

The material used in the biodegradable range (Vegetagraf) comes from French agricultural by-products. It is made up of 100% starch and plant fibres. Complete biodegradation takes place over the year in situ and enters the humification cycle. 100% plant-based, the clip leaves no residue thanks to the action of micro-organisms naturally present in the soil. They are made from food-grade materials and are free from heavy metals so as not to harm the juice during the pressing cycle. Ergonomic and lightweight, they won't get tangled up in your pocket and are soft on your hands.

**This model is recommended for trellising wide vines with medium to heavy constraints.**

**Product strengths :**

Bio-sourced  
Biodegradable in 24 months  
Food-grade material  
Ergonomic

**Clip placement recommendations**

- One clip between each plant.
- No clip between the post and the plant.

**Distance between wires : 46 mm**

Wire entry : 8 mm  
Ø Max wire diameter : 4 mm

**Clip  
Real Size**

Thickness : 2 mm  
Length : 32 mm  
Height : 17 mm

**Average measured resistance  
of a new clip : 14 Kg**

**Packaging**

- 2 800 pieces bucket  
240 buckets / pallet

**All our buckets can be recycled**
