MINIGRAF®

CLIP FOR LOW VINE

Our degradable clips are made from food-grade plastic so that they have no impact on the health of juices. They degrade by fragmentation under the effect of UV light (which is why they are called photo-degradable), extreme temperatures and wire tension.

Ergonomic and lightweight, they don't get tangled up in your pocket and are hand-safe. After several decades in use, the effectiveness and reliability of this range is widely recognised in all French vineyards and abroad. The right choice for a degradable clip is one with sufficient strength at the time of installation (trellising) and very low residual strength so that it can be easily broken before pruning.

Minigraf® is recommended for trellising low vines. It can also be used to keep wires on the ground in the off-season and for trellising raspberry bushes. Minigraf is the least expensive staple on the market.

Distance between wires : 10 mm

Wire entry : 5,1 mm
Ø Max wire diameter : 3,6 mm

Clip Real Size

Thickness : 1,7 mm
Length : 18,8 mm
Height : 16 mm

Average measured resistance of a new clip : 9,5 Kg

Residual resistance measured
after one season :

- strongest : 2 kg
- lowest : 0,8 Kg
- average : 1,4 Kg

Packaging

- 6 500 pieces bucket
240 buckets / pallet
- 28 000 pieces bucket
60 buckets / pallet
- 30 000 pieces box
50 boxes / pallet
