SOLIGRAF 42®

WIDE VINEYARD CLIP

Our degradable clips are made from food-grade plastic so that they have no impact on the health of juices. They degrade by fragmentation under the effect of UV light (which is why they are called photo-degradable), extreme temperatures and wire tension. Ergonomic and lightweight, they don't get tangled up in your pocket and are hand-safe. After several decades in use, the effectiveness and reliability of this range is widely recognised in all French vineyards and abroad. The right choice for a degradable clip is one with sufficient strength at the time of installation (trellising) and a very low residual strength so that it can be easily broken before pruning.

Soligraf42® is a high-strength clip with a very wide spacing and is recommended for trellising mechanically pruned vines. Its spacing gives good hold to the lifting wires without increasing their tension. It is very useful for vines with high vigour, a lot of wood and very long rows.

Clip placement recommendation

- One clip between each plant.
- No clip between the post and the plant.

Distance between wires : 42 mm

Wire entry : 26 mm
Ø Max wire diameter : 4 mm

Clip Real Size

Thickness : 5 mm
Length : 50 mm
Height : 10 mm

Average measured resistance of a new clip : 16,5 Kg

Residual resistance measured
after one season :

- highest : 6,2 Kg
- lowest : 3,9 Kg
- average : 4,8 Kg

Packaging

- 9 000 pieces box
50 boxes / pallet
