CLIP FOR WIDE VINES

The material used in the biodegradable range (Vegetagraf) comes from French agricultural by-products. It is made up of 100% starch and plant fibres. Complete biodegradation takes place over the year in situ and enters the humification cycle. 100% plant-based, the clip leaves no residue thanks to the action of micro-organisms naturally present in the soil. They are made from food-grade materials and are free from heavy metals so as not to harm the juice during the pressing cycle. Ergonomic and lightweight, they won't get tangled up in your pocket and are soft on your hands.

This high resistance model, with a very wide opening is recommended for trellising vines trained in Precision Short Pruning. Its wide spacing ensures a firm hold of the lifting wires without increasing their tension. It is especially useful in plots with high vigor, abundant wood, and very wide rows.

Product strengths :

Bio-sourced
Biodegradable in 24 months
Food-grade material
Ergonomic
Wide spacing

Clip placement recommendations

- One clip between each plant.
- No clip between the post and the plant.

Distance between wires : 46 mm

Wire entry : 25 mm
Ø Max wire diameter : 4 mm

**Clip
Real Size**

Thickness : 5 mm
Length : 60 mm
Height : 14 mm

**Average measured resistance
of a new clip : 15,5 Kg**

Packaging

- 5 000 pieces bucket
60 bucket / pallet

All our buckets can be recycled
