STAROS[®] by GNP

CLIP FOR LOW VINE

Our degradable clips are made from food-grade plastic so that they have no impact on the health of juices. They degrade by fragmentation under the effect of UV light (which is why they are called photo-degradable), extreme temperatures and wire tension. Ergonomic and lightweight, they don't get tangled up in your pocket and are hand-safe. After several decades in use, the effectiveness and reliability of this range is widely recognised in all French vineyards and abroad. The right choice for a degradable clip is one with sufficient strength at the time of installation (trellising) and a very low residual strength so that it can be easily broken before pruning.

Staros[®] is recommended for low vines with medium to high wire tension. It is sold exclusively by Soufflet Vigne.

Distance between wires : 15 mm

Wire entry : 5 mm
Ø Max wire diameter : 4 mm

Clip Real Size

Thickness : 2 mm
Length : 23 mm
Height : 13,5 mm

Average measured resistance of a new clip : 11 Kg

Residual resistance measured
after one season :
- strongest : 2,5 Kg
- lowest : 1,2 Kg
- average : 1,9 Kg

Packaging

- 6 000 pieces bucket
240 buckets / pallet
