VITAGRAF®

CLIP FOR HIGH VINE

Our degradable clips are made from food-grade plastic so that they have no impact on the health of juices. They degrade by fragmentation under the effect of UV light (which is why they are called photo-degradable), extreme temperatures and wire tension. Ergonomic and lightweight, they don't get tangled up in your pocket and are hand-safe. After several decades in use, the effectiveness and reliability of this range is widely recognised in all French vineyards and abroad. The right choice for a degradable clip is one with sufficient strength at the time of installation (trellising) and a very low residual strength so that it can be easily broken before pruning.

Vitagraf® is recommended for trellising wide vines with medium to heavy stresses. It is a high-strength clip. It is the most widely used clip in the world for this type of vine.

Clip placement recommendation

- One clip between each plant.
- No clip between the post and the plant.

Distance between wires : 20 mm

Wire entry : 8 mm
Ø Max wire diameter : 4 mm

Clip Real Size

Thickness : 2 mm
Length : 33 mm
Height : 17,5 mm

Average measured resistance of a new clip : 14 Kg

Residual resistance measured
after one season :

- strongest : 2,7 Kg
- lowest : 1,3 Kg
- average : 2,1 Kg

Packaging

- 3 000 pieces bucket
240 buckets / pallet
- 13 000 pieces bucket
60 buckets / pallet
- 15 000 pieces box
50 boxes / pallet
