CLIP FOR LOW VINE
LOW TO MEDIUM CONSTRAINTS

CB20®
FINE

Our degradable clips are made from food-grade plastic so that they have no impact on the health of juices. They degrade by fragmentation under the effect of UV light (which is why they are called photodegradable), extreme temperatures and wire tension. Ergonomic and lightweight, they don't get tangled up in your pocket and are hand-safe. After several decades in use, the effectiveness and reliability of this range is widely recognised in all French vineyards and abroad. The right choice for a degradable clip is one with sufficient strength at the time of installation (trellising) and a very low residual strength so that it can be easily broken before pruning.

CB20® FINE is recommended for wide, low-stress vines.

Clip placement recommendation

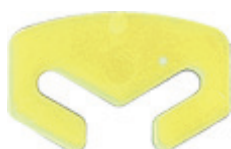

- One clip between each plant.
- No clip between the post and the plant.

Distance between wires : 20 mm

Wire entry : 9 mm
Ø Max wire diameter : 4 mm

Clip Real Size

Thickness : 1,3 mm
Length : 29,4 mm
Height : 18,4 mm

Average measured resistance of a new clip : 11 Kg

Average residual resistance
measured after one year :
between 2 and 5 Kg

Packaging

- 6 200 pieces bucket
140 buckets / pallet
