

KEEPFIL UNIVERSEL

Keepfil Universel is the wire holder suitable for all types of posts: wooden, metal or composite, regardless of the post's shape (except for angle posts). It can be used with all types of wire: metal or plastic, lifting wire or fixed wire. The Keepfil Universel system prevents abrasion of both the wire and the posts. On wooden posts, it replaces spikes, eliminating the risk of puncturing tyres or press bladders. On profiled posts, it effectively replaces a broken clamp. At the bottom of the post, it is also the ideal solution for storing wires during the winter. The Keepfil Universel is resistant to grape harvesters and is 100% made in France.

Strong points :

- Tool-free installation
- No abrasion
- UV-resistant treatment
- 100% recyclable

Actual size

More informations :

Suitable for round wooden posts and steel profiles.

Packaging :

- Bucket of 500 units
- 240 buckets per pallet

Conditions of use :

To tighten the Keepfix securely, use the STHV pliers.

About the product :

Length: 23 mm
 Height: 40 mm
 Thickness: 12.5 mm
 Maximum wire diameter: 4 mm
 Clamp strength: 72 kg
