VITAGRAF30®

— VEGETAL —
CLIP FOR HIGH VINES

The material used in the biodegradable range (Veetagraf) comes from French agricultural by-products. It is made up of 100% starch and plant fibres. Complete biodegradation takes place over the year in situ and enters the humification cycle. 100% plant-based, the clip leaves no residue thanks to the action of micro-organisms naturally present in the soil. They are made from food-grade materials and are free from heavy metals so as not to harm the juice during the pressing cycle. Ergonomic and lightweight, they won't get tangled up in your pocket and are soft on your hands.

Some vineyards need a clip longer than 20 mm, so we've created the 30 mm Vitagraf® for them.

Product strengths :

- Bio-sourced
- Biodegradable in 24 months
- Food-grade material
- Ergonomic
- Special for high vines
- High resistance

Clip placement recommendations

- One clip between each plant.
- No clip between the post and the plant.

Distance between wires : 30 mm

Wire entry : 17,5 mm
Ø Max wire diameter : 4 mm

Clip Real Size

Thickness : 2,7 mm
Length : 42,7 mm
Height : 18,8 mm

**Average measured resistance
of a new clip : 19 Kg**

Packaging

- 2 600 pieces bucket
140 buckets / pallet
- 6 500 pieces bucket
60 buckets / pallet

All our buckets can be recycled
